SPRING / FALL 2027 SYLLABUS & LAB SANDBOX · $0 ACADEMIC GRANT

CAMPUS CODE: POCKETCORP2027

Teach Accountable Multi-Agent Governance With A Personal Corporation in Every Student's Pocket

University Faculty, Research Lab & Student Society Brief: Built in British Columbia by Omnia Theatre Inc. for Business Schools, Computer Science / AI Multi-Agent Labs, and Film & Media Production Departments—plus campus Entrepreneurship, AI, and Film Societies.

THREE ACADEMIC DISCIPLINES · ONE INSPECTABLE MULTI-DEPARTMENT SANDBOX

01 · BUSINESS & ENTREPRENEURSHIP

Gradable Venture Orchestration

Move beyond unreviewed chatbot essays. Student venture teams coordinate 9 persistent rooms (PM, CFO, Strategy, QA, Red-Team, Brand) under a fixed $15 compute cap—exporting signed decision ledgers for grading.

02 · CS & MULTI-AGENT AI LABS

Code Law vs. Prompt Law

Inspect deterministic `before_tool_call` authority hooks, RFC 8785 canonical JSON action hashes, sequence-fenced `Delicate-List` guest isolation, and self-hosted BYOK local model execution.

03 · FILM, ANIMATION & MEDIA

Human-Authored Production Office

Pair Ptolemy Studio (14-day Creator's tier trial—upload your own screenplay & original illustration style, zero artist scraping) with King's Audience to manage thesis budgets, call sheets, and festival EPKs.

TURNKEY 3-LAB CLASSROOM MODULE (DROP INTO ANY 2027 VENTURE, AI SYSTEMS, OR PRODUCING SYLLABUS)

LAB 01 · 30 MINS IN-CLASS

Charter & 16kHz Voice Intake

Teams (1–4 students) convene their First Board Meeting via Voice Vault, scope a real venture or production problem across 9 rooms, and set a monthly CourtStrip compute runway cap.

LAB 02 · ASYNC SPRINT

Cross-Room Audit & Guest Fence

Students route bulk tasks to economy chips (Luna $) vs. frontier reasoning ($$$$), stress-test outputs with Astyr (Red-Team), and invite a peer TA via a sequence-fenced Delicate-List guest seat.

LAB 03 · GRADED ARTIFACT

Signed Shelf v2 Executive Packet

Teams submit finished deliverables alongside their cryptographic Needs-You Decision Ledger—proving which human student reviewed, revised ("Done w/ Note"), and signed every gate.

UNIVERSITY IT, PRIVACY (FIPPA / FERPA / GDPR) & STUDENT IP SAFE HARBOR

100% Student & Faculty IP Retention: Omnia Theatre claims zero rights over student code, scripts, art styles, or venture plans; zero customer data is ever used to train models.

Canadian Residency & Zero-PII Alias Mode: Encrypted per-cohort SQLCipher vaults hosted in Canada (`northamerica-northeast1`) supporting pseudonymous student seat IDs for BC FIPPA, US FERPA & EU GDPR alignment.

Air-Gapped / Lab GPU BYOK Option: CS & AI labs can run `@ptolemy/court-node` against local Ollama/MLX weights or institutional API keys at **0% token markup**.

Zero Procurement Friction: Classroom cohorts activate at $0 academic grant cost with no student credit card required.

STUDENT SOCIETIES & HACKATHONS

48-Hour Campus Venture & Agent Challenge

Commerce societies, AI clubs, and student film unions unlock club-wide **POCKETCORP2027** perks plus sponsored weekend hackathon prize pools.

Faculty & Club Allocation:
- **Classrooms/Labs:** $0 Semester Sandbox + 2 Instructor Seats
- **Student Founders:** 50% Off × 3 Mos + $50 Runway Credit
