King's Audience: A Personal Corporation in Your Pocket!

Your Corporation Works 24/7. You Just Sign the Cards. Stop wearing ten exhausting back-office hats alone—or babysitting a single forgetful chatbot. King's Audience puts **nine specialized AI department heads**, a real-time **CFO Credit Runway** strip, and **Face ID / S-Pen Needs-You approval gates** inside one hardware-encrypted command deck across iOS, macOS, Android, and Web.

FOUR PRODUCTION-VERIFIED GOVERNANCE PILLARS

01 · CRYPTOGRAPHIC HUMAN CONTROL

Biometric Needs-You Decision Cards

Departments draft, code, QA, and reconcile overnight—but external emails, spend, and live deploys halt at an RFC 8785 canonical card until you sign via Face ID, passkey, or Galaxy S23 Ultra S-Pen.

02 · DETERMINISTIC SPEND CONTROL

Live CFO Credit Runway ($ to $$$$)

Zero surprise AI bills. Route routine receipts & QA to penny-lean economy models (Luna $, Sol $$) while reserving deep reasoning (Opus $$$, Fable $$$$, local Astra $$$$) for boardroom architecture.

03 · HANDS-FREE FOUNDER VELOCITY

16kHz Encrypted Voice Vault

Run your company on the walk between job sites or meetings. Speak naturally into the Voice Dictation Deck to fan out scoped orders across PM, CFO, Engineering, and Brand in seconds.

04 · CONTRACTOR-SAFE COLLABORATION

SQLCipher + Delicate-List Guest Seats

Invite a freelance developer, agency partner, or bookkeeper into a dedicated room safely. Sequence-fenced Delicate-List boundaries keep .env keys, bank credentials, and private rooms locked.

NINE COORDINATED EXECUTIVE DEPARTMENT HEADS (PERSISTENT MULTI-ROOM MEMORY)

Chief of Staff & PM — Saroya
Turns voice notes into scoped plans, client proposals, investor memos & marching orders.

CFO & Runway Bench — Jewel
Categorizes receipts, models unit margins, and enforces daily Green/Amber/Red burn caps.

Systems & APIs — Melody
Wires webhooks, CRM/inbox pipelines, and backend automations without brittle glue.

Product & UI Design — Cerulia
Builds conversion-ready web pages, pitch decks, visual systems & mobile flows.

QA & Compliance Sieve — Affin
Audits outbound copy, links, contract math, and statutory checklists pre-approval.

Red-Team & Security — Astyr
Stress-tests permissions, risky clauses & prompt-injection vectors; locks guest fences.

Market Strategy — Hurrian
Maps competitors, pricing wedges, grants/tax credits, and 90-day GTM playbooks.

DevOps & Release Ops — Krishe
Monitors uptime, cloud/local nodes, Litestream backups, and release pipelines.

Brand & Creative — Jovin
Sharpens founder storytelling, video scripts & launch hooks so small teams sound iconic.

WHY FOUNDERS UPGRADE BEYOND CHATBOTS & SEAT-TAX SAAS

Platform Model	Memory & Coordination	Safety & Spend Control
Single Chatbot (ChatGPT / Claude tab)	1 stateless thread; forgets context & never self-audits.	No action gates, no guest seats, manual copy-paste.
Generic Team SaaS ($25–$35/user seat tax)	Noisy chat scroll; humans still do 100% of the work.	Broad workspace visibility; runaway AI add-on bills.
King's Audience (Pocket Corporation)	**9 coordinated dept rooms + Shelf v2 finished deliverables.**	**Face ID / S-Pen Needs-You cards + Delicate-List + Runway cap.**

PREDICTABLE PLANS & RUNWAY
